

RGP-2

DORADO ADJUSTABLE WORK POSITIONING/RESTRAINT LANYARD RGP-2

The Dorado is a simple to use work positioning system available as a lanyard with a wear resistant sleeve for improved durability, or as a line for use on sloping surfaces, rooftop and leading-edge work.

This safety device is designed to attach to either the lateral D rings when used with a harness suitable for work positioning (EN 358) or to a harness fall arrest attachment point (EN 361). It helps workers maintain a stable and secure position while performing tasks at height.

- Adjuster has no moving parts - longevity
- Ergonomic design - easy manipulation
- Black/grey patterned rope - better visibility
- Lightweight
- Made from abrasion resistant materials

EN 358:2018

	WORK POSITIONING	RESTRAINT
Material:	Rope - 11mm polyamide Adjuster - Aluminium Wear sleeve - Polyester	Rope - 11mm polyamide Adjuster - Aluminium
Connectors*:	Aluminium double action snap hook Aluminium triple action karabiner	Aluminium double action scaffold hook Aluminium triple action karabiner
Lengths:	1m 2m 3m 5m 10m	10m 20m 30m
Weight range:	0.4 - 1.2kg	1.5 - 3kg
Max. user weight:	140kg	140kg
